

A WORLD-FAMOUS TABLE

There is a table (not one for dinner) that's probably the most famous table of science.

If you learn how to read it, you'll have quick access to important stuff about elements. It's called the Periodic Table (because it's written in rows, called periods).

Build your skill at reading the Periodic Table by finding the missing information in the samples below.

REMEMBER:

atomic mass = protons + neutrons

atomic number = # protons

protons = # electrons

1 H Hydrogen 1	1. a. atomic number _____	79 Au Gold 197	5. a. # electrons _____ b. # protons _____ c. atomic number _____ d. name of element _____	82 Pb Lead 207	9. a. element name _____ b. # protons _____
12 Mg Magnesium 24	2. a. element name _____ b. atomic number _____	28 Ni Nickel 59	6. a. atomic mass _____ b. element symbol _____	40 Zr Zirconium 91	10. a. # electrons _____ b. atomic mass _____
26 Fe Iron 56	3. a. # protons _____ b. element symbol _____	11 Na Sodium 23	7. a. element symbol _____ b. # neutrons _____ c. element name _____	88 Ra Radium 226	11. a. atomic number _____ b. # neutrons _____
5 B Boron 11	4. a. atomic number _____ b. element name _____	78 Pt Platinum 195	8. a. atomic number _____ b. # neutrons _____	29 Cu Copper 64	12. a. atomic mass _____ b. # neutrons _____

Name _____
