

December 12, 2018

Dear Parents/Guardians,

As part of the grade 10 enriched science program students have been working on a course long project called SCICAN! This project has allowed students to explore an area of personal interest in depth as part of a scientific investigation.

As a culminating task for the SCICAN! Projects students will be creating both a short oral presentation and a journal publication. You are invited and encouraged to come watch these presentations. Presentations will take place during regularly scheduled science class times on Thursday January 10th and Friday January 11th.

Students have been informed of their specific presentation date and it is indicated at the bottom of this form. If however, you can only attend one of the oral presentation days please let me know and I will work to ensure they present on that day.

If you are able to attend, please be sure to sign in at the main office prior to proceeding to the library conference room.

Your child will be presenting on:

Thursday January 10th / Friday January 11th

I look forward to having you join us.

Ms. H. Loree
