

Name: _____

Fill In The Blanks - Chemical vs. Natural Cleaner Lab

Title

Question: *(What question is this lab trying to answer? What are you trying to clean? What are you comparing?)*

Hypothesis: *(Predict your answer to the question: If _____ then _____ because _____)*

Materials: *(List everything you need to complete the experiment. Include how much!)*

Procedure: *(A detailed list of steps describing how to complete the experiment. Include what will be cleaned & recipe used to make natural cleaner.)*

Recipe:

Data: (Make a table of the observations and data you collected during the experiment.)

<i>Cleaner</i>	<i>What was measured?</i> _____		
	<i>Where did you measure it? ↻</i>		
<i>Chemical Cleaner</i>			
<i>Natural Cleaner</i>			

Conclusion: (State whether the hypothesis was correct or not. Answer the original question)

Questions:

1. Why should people consider using natural cleaners in their houses?

2. How would you improve the recipe for the natural cleaner?

3. Will you use natural cleaners in your house? Why or why not?
