

Explain threshold?	Explain how ribosomes play a role in gene expression.	What is the order of molecules in the Krebs cycle?	What is the difference between excitatory NT and inhibitory NT?
What is an operon?	What controls reabsorption of water in the collecting duct?	What does the pituitary do?	What type of molecules can cross a phospholipid bilayer passively?
How does the Loop of Henle work?	Where does the ETC take place (specifically)?	What is an intron?	What is the control center for human temperature?
