

Nerve Cells

2 Types of Nerve Cells

- 1) **Glial cells** – _____ conducting, involved with structural _____ and _____
- 2) **Neurons** – _____ impulses, functional units, 3 types
 1. **Sensory neurons** (_____) → clusters called _____ Sense & relay stimuli from _____ to _____
 2. **Interneurons** (association neurons) → In brain & spinal cord. _____ & _____ sensory stimuli. _____ afferent & efferent neurons
 3. **Motor neurons** (efferent) → _____ information to the _____ ex. muscles, glands. organs

Dendrites –

Cell body –

Nucleus –

Axon –

Schwann cells – (a type of glial cell)

Myelin sheath –

Nodes of Ranvier –
