

# Stem Cell Ethics FlipGrid Assignment

Based on what was read, discussed in class and personal research answer the following question:

## Should the Canadian government fund stem cell research?

Use the **SEE** (*statement, explanation, example(s)*) method to structure your answer.

- **Statement** of your point of view ③

*Should be a complete thought, not simply yes or no. Include a main why or circumstances.*

- **Explanation** for your point of view ③

*Relate the main why to specific concepts surrounding stem cells & biology.*

- Provide min 2 specific **Canadian examples**: ③

*How, where stem cells are being used. Studies currently being conducted...*

- Indicate where the facts/data comes from ②

*Remember, this is **NOT** about your opinions. Your statements must be factually supported.*

You have 60 seconds to record your answer.

Points	0	1	2	3
<b>Statement</b>	No claim	Simple yes/no claim	Claim demonstrates a surface understanding of the science.	Claim demonstrates a deep understanding of the science.
<b>Explanation</b>	No explanation	Explanation is illogical, incomplete or inaccurate	Relates examples to scientific principles in order to support claim. Reasoning is <b>mostly</b> logical, complete & accurate	<b>Thoroughly</b> relates examples to scientific principles in order to support claim. Reasoning is logical, complete & accurate
<b>Examples</b>	No examples	<b>Some</b> evidence used to support the claim is accurate, sufficient & appropriate	<b>Most</b> evidence used to support the claim is accurate, sufficient & appropriate	<b>All</b> evidence used to support the claim is accurate, sufficient & appropriate
<b>References/ Resources</b>	Not provided	One resource used	Two or more resources used	
<b>Total</b>				<b>/11</b>
