

## Summary of Cellular Respiration:

Summarize the inputs (reactants) and outputs (products) of cellular respiration.

Compare the reactants and products in the table with the figures that illustrate the various stages.

	Glycolysis (per glucose)	Pyruvate Oxidation (per glucose)	Krebs Cycle (per glucose)	ETC and chemiosmosis (per glucose)
<b>Location</b>				
<b>Reactants</b>	- glucose			
<b>Products</b>				
<b>ATP required</b>				
<b>ATP produced</b>				
<b>Net ATP produced</b>
